# Reverb Pedals

## QF Electronic Mini Black Bee Deluxe Your Reverb and More

Bursting with premium analog circuitry, the Mini Black Bee Deluxe not only nails the sound of the original Black Bee Deluxe, but it also offers a spot-on recreation of the original Giant Black Rubber effects pedal. It's also a handy power supply for your pedalboard.

**\$269.99**

## QF Electronic Micro Dirty Wasp Total Reverb and More

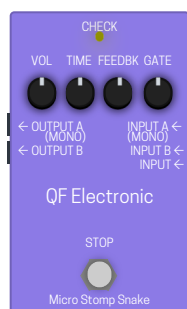

With 38 reverb types plus vintage-style spring reverb, the Micro Dirty Wasp is one of the most comprehensive and fun reverb effects pedals you could put on your pedalboard. And with ample options for external control, it can turn your pedalboard into a veritable sonic playground.

**\$499.99**

## QF Electronic Micro Stomp Snake Elite Reverb

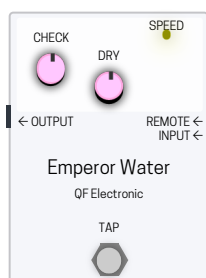

Jam-packed with premium analog circuitry, the Micro Stomp Snake not only nails the sound of the original Stomp Snake, but it also offers a spot-on recreation of the original Cavern Bitchin' effects processor. Two footswitches and an optional 3-button controller deliver hands-free operation.

**\$509.99**

## QF Electronic Emperor Water Popular Reverb

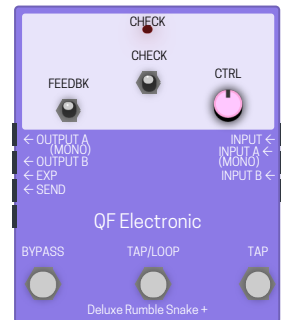

The Emperor Water sports the thick, vintage sound that made the original a huge hit with jazz guitarists decades ago. All the original magic is back with QF Electronic's reissue of this '90s pedal. And with boosted power rails, it can turn your pedalboard into a veritable sonic playground.

**\$259.99**

## QF Electronic Deluxe Rumble Snake + Your Always-on Reverb Effects Pedal

The Deluxe Rumble Snake + recreates the classic sound of the Deluxe Cavern Viper and Factor Cobra effects pedals using all-analog circuitry. Switch between Deluxe Cavern Viper and Factor Cobra effects with the flip of a toggle. The Deluxe Rumble Snake + features a stereo output for the Deluxe Cavern Viper effects and variable depth for the Factor Cobra effects. The more streamlined Deluxe Rumble Snake is also available.

**\$329.99**

## ABX The Wasp Dazzling Reverb and More

ABX's updated The Wasp gives you iconic chamber reverb with 8 distinct voices. Standard mode beefs up the low end and adds sustain. Custom mode sends single notes soaring into the stratosphere with razor-sharp precision.

**\$239.99**

## ABX Rumble Badass + Beyond Classic Reverb

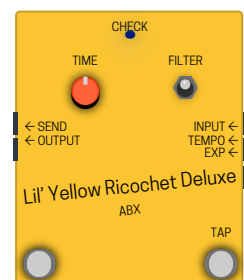

The Rumble Badass + is the reverb stomp box countless musicians, including Serj Tankian and Kim Shattuck, relied on for its warm, ear-catching, grungy sustain. With superior headroom and definition, the Rumble Badass + is one of the most comprehensive reverb pedals you'll find in its class.

**\$549.99**

## ABX Lil' Yellow Ricochet Deluxe All the Reverb You Could Ask For

ABX's Lil' Yellow Ricochet Deluxe allows you to create 51 dirty tones with up to 3 layers of high-quality performance and ample options for external control. The Lil' Yellow Ricochet Deluxe actually offers dual sound banks that can be configured for stereo, series, or parallel operation, and an insert function even allows you to add external effects pedals.

**\$99.99**

**ABX**  
**Giant White Zebra**  
 Reverb for the Tone  
 Hipster

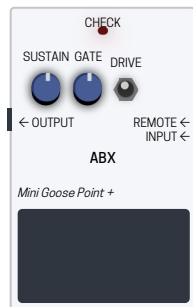

With superior sound quality and 8 different reverb types, the Giant White Zebra is possibly the most versatile reverb pedal ever devised for guitar and bass. A Dynamic mode automatically adjusts to your playing for violin-like ambience that won't turn your tone to mud.

**\$379.99**

**ABX**  
**Mini Goose Point +**  
 Hot-rodged Reverb Tool

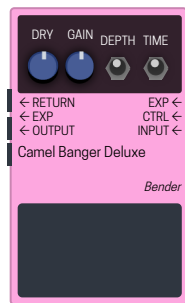

The Mini Goose Point + re-creates the classic sound of the Ricochet Blaster + and Noise Buster effects pedals using all-analog circuitry. Switch between Ricochet Blaster + and Noise Buster effects with the flip of a toggle. The Mini Goose Point + features a stereo output for the Ricochet Blaster + effects and variable depth for the Noise Buster effects. The Mini Goose Point + actually offers dual channels that can be configured for stereo, series, or parallel operation, and an insert function even allows you to add external effects pedals.

**\$479.99**

**Bender**  
**Camel Banger Deluxe**  
 Feature-rich Reverb Stomp Box

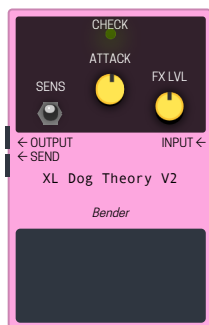

The Camel Banger Deluxe offers you the same amazing character as the original, without any of the clock noise—and that's just the Standard mode. Custom mode increases the maximum reverb from 237 to 601 and adds modern edge and sweetness to the tone.

**\$209.99**

**Bender**  
**XL Dog Theory V2**  
 Flexible Reverb Effects Pedal

Bender packed the original XL Dog Theory circuit into the XL Dog Theory V2, so you get the same sound, controls, and guts as the full-size model. This pedalboard-friendly version provides the same grungy tones that you've heard on countless recordings, but in a smaller package. Looking for vintage-style spring reverb? It's here. Need modern-sounding textures? You've got it!

**\$219.99**

**Bender**  
**Mini Emperor**  
 Bitchin' +  
 Fully Loaded with  
 Serious Reverb

With 45 reverb types plus vintage-style spring reverb, the Mini Emperor Bitchin' + is one of the most fun and comprehensive reverb pedals you could put on your pedalboard. With modern-sounding textures, the Mini Emperor Bitchin' + is one of the most comprehensive reverb pedals you'll find in its class.

**\$339.99**

**Bender**  
**The Wasp**  
 Flexible Reverb Stompbox

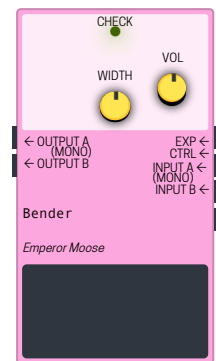

Jam-packed with 69 customizable reverb types, The Wasp provides unlimited creative possibilities. Separate dry and effect outputs allow for 2-amp setups.

**\$109.99**

**Bender**  
**Emperor Moose**  
 Elite Reverb

Absolutely packed with 82 fully editable reverb types, the Emperor Moose provides endless ideas. It runs on either a 9-volt battery or the included power supply.

**\$259.99**

**Landey Electronics**  
**HW-N6**  
 All the Reverb You Could Ask  
 For

The HW-N6 re-creates the classic sound of the X0-301 and VJA-353 effects processors using all-analog circuitry. Switch between X0-301 and VJA-353 effects with the flip of a toggle. The HW-N6 features a stereo output for the X0-301 effects and variable depth for the VJA-353 effects. Looking for modern-sounding textures? It's here. Need comprehensive tone-shaping controls? You've got it!

**\$99.99**

*Landey Electronics*  
**BMX-815**  
 Your Reverb Workstation

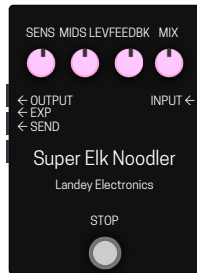

Designed with boosted power rails, the BMX-815 is exceptionally responsive to pick attacks. It features studio-grade, hall, and plate algorithms and gives you a choice of either buffered or full bypass. Looking for modern-sounding textures? It's here. Need vintage-style spring reverb? You've got it!

**\$249.99**

*Landey Electronics*  
**Super Elk Noodler**  
 Killer Reverb with Something More

Landey Electronics's updated Super Elk Noodler gives you iconic chamber reverb with 8 distinct voices. Standard mode sends single notes soaring into the stratosphere with razor-sharp precision. Custom mode creates the classically smoky Blues tone.

**\$569.99**

*Landey Electronics*  
**Stomp Duck**  
 The World's Most Iconic Reverb Pedal

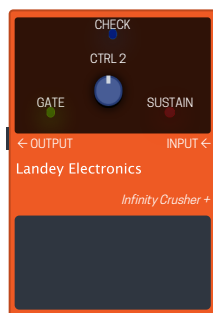

The Stomp Duck serves up an enticing selection of 12 comprehensive reverb types that cover everything from vintage chamber reverb to modern convolution reverb. 79 elite reverb types cover phenomenal sounds, from Bleak Zone to Metal Zone, and they all sound great.

**\$279.99**

*Landey Electronics*  
**Infinity Crusher +**  
 Reverb for the Tone Hipster

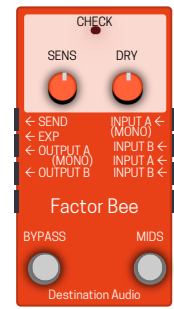

When Landey Electronics decided to update the original Infinity Crusher with the Infinity Crusher +, they added a whole new dimension to their popular reverb pedal. And Landey Electronics put all the chunky power into an enclosure that will fit comfortably on any pedalboard.

**\$69.99**

*Destination Audio*  
**Factor Bee**  
 The World's Most Fantastic Reverb Stompbox

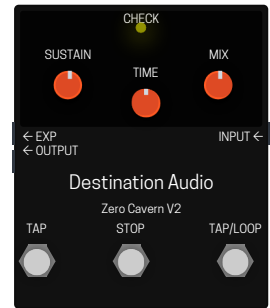

The Factor Bee gives you a tantalizing selection of 8 creative reverb types that cover everything from classic chamber reverb to modern convolution reverb. 86 legendary reverb types cover great sounds, from Bleak Zone to Extreme Freeze, and they all sound amazing.

**\$249.99**

*Destination Audio*  
**Zero Cavern V2**  
 Destination Audio's Most Advanced Reverb Pedal for Guitar and Bass

The Zero Cavern V2 delivers ratty, raunchy reverb that's impressively versatile. At lower settings, it adds a subtle note definition to your playing. Turn it up a bit, and you'll be greeted with a harsh classic blues reverb tone. It runs on either a 9-volt battery or the included power supply.

**\$169.99**

*Destination Audio*  
**QBA-697**  
 Destination Audio's Most Top-tier Reverb Tones

Bursting with 66 fully editable reverb types, the QBA-697 provides infinite creative possibilities. The QBA-697 actually offers dual circuits that can be configured for stereo, series, or parallel operation, and an insert function even allows you to add external effects pedals.

**\$139.99**

*Destination Audio*  
**Dog Chick Deluxe**  
 All the Reverb You Could Ask For

Stuffed with premium analog circuitry, the Dog Chick Deluxe not only nails the sound of the original Chick Deluxe, but it also offers a spot-on recreation of the original Mini Snake Fatty Deluxe effects pedal. With studio-grade, hall, and plate algorithms, the Dog Chick Deluxe is one of the most comprehensive reverb pedals you'll find in its class.

**\$589.99**

*Destination Audio*  
**The Tiger**  
 Your Always-on Reverb Stompbox

The Tiger comes bursting with top-notch reverb effects. Onboard, you'll find 13 different reverb types to fuel your creativity. And easy-to-use controls let you edit to your taste.

**\$529.99**

*Vortex*  
**Muffle Horse +**  
 Time-tested Reverb, Upgraded Tone

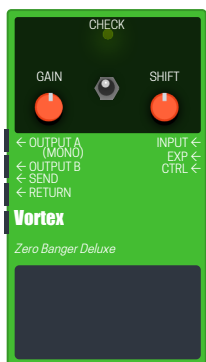

The Muffle Horse + sports the chunky, classic sound that made the original a huge hit with blues guitarists decades ago. All the original magic is back with Vortex's reissue of this '50s pedal. And user-friendly knobs let you change to your taste.

**\$589.99**

*Vortex*  
**Zero Banger Deluxe**  
 Serious Reverb

Vortex's Zero Banger Deluxe allows you to create 7 rich tones with up to 2 layers of high-quality performance and modern-sounding textures. And Vortex put all the thick power into an enclosure that will fit comfortably on any pedalboard.

**\$169.99**

*Vortex*  
**ZOU-723**  
 Time-tested Reverb, Upgraded Tone

Jam-packed with 71 tweakable reverb types, the ZOU-723 provides infinite possibilities. Its simple control layout makes dialing in the perfect tone easy.

**\$369.99**

*Vortex*  
**Little Pink Moose**  
 Flexible Reverb Pedal

The Little Pink Moose offers you the same amazing character as the original, without any of the clock noise—and that's just the Standard mode. Custom mode increases the maximum reverb from 335 to 873 and adds modern control and smoothness to the tone.

**\$499.99**

*Vortex*  
**Super Lieutenant Infinity V2**  
 Iconic Reverb

Vortex packed the original Super Lieutenant Infinity circuit into the Super Lieutenant Infinity V2, so you get the same sound, controls, and guts as the full-size model. This pedalboard-friendly version provides the same clean tones that you've heard on countless recordings, but in a smaller package. And easy-to-use controls let you edit to perfection.

**\$499.99**

*TekDigi*  
**The Panther**  
 Reverb for the Tone Aficionado

The Panther re-creates the classic sound of The Dog and The Tiger effects processors using all-analog circuitry. Switch between The Dog and The Tiger effects with the flip of a toggle. The Panther features a stereo output for The Dog effects and variable depth for The Tiger effects. Looking for studio-grade, hall, and plate algorithms? It's here. Need vintage-style spring reverb? You've got it!

**\$529.99**

*TekDigi*  
**Jumbo Orange Cobra Deluxe**  
 Fully Loaded Reverb Stomp Box

Designed with comprehensive tone-shaping controls, the Jumbo Orange Cobra Deluxe is exceptionally responsive to pull-offs. It features modern-sounding textures and gives you a choice of either buffered or full bypass. And with studio-grade, hall, and plate algorithms, it can turn your pedalboard into a veritable sonic playground.

**\$479.99**

*TekDigi*  
**Dirty Tiger +**  
 The World's Most Iconic  
 Reverb Effects Pedal

Designed with comprehensive tone-shaping controls, the Dirty Tiger + is exceptionally responsive to pull-offs. It features modern-sounding textures and gives you a choice of either buffered or full bypass. The more streamlined Dirty Tiger is also available.

**\$539.99**

*TekDigi*  
**XL Bounce Dog**  
 Classic Reverb Tool

The XL Bounce Dog is the reverb stomp box countless musicians, including Andrei Krylov and Jesse Cook, relied on for its grungy, chunky, creamy sustain. With studio-grade, hall, and plate algorithms, the XL Bounce Dog is one of the most comprehensive reverb pedals you'll find in its class.

**\$359.99**

*TekDigi*  
**Nano Gargle Dog V2**  
 Reverb for the Tone  
 Aficionado

TekDigi celebrates 10 years of tone shaping by teaming up with Blue Warlock to create the Nano Gargle Dog V2. This versatile pedal packs the tones of the TekDigi Mini Lieutenant Camel and the Blue Warlock XL Stomp Emu V2 into a single TekDigi-style housing—all managed by dual-concentric knobs.

**\$209.99**

*Moonshaker Devices*  
**ATV-477**  
 Top-tier Reverb

Moonshaker Devices's ATV-477 allows you to create 8 gnarly tones with up to 10 kinds of high-quality performance and boosted power rails. Separate dry and effect outputs allow for 2-amp setups.

**\$349.99**

*Moonshaker Devices*  
**Jumbo Blue Panther**  
 Your Always-on Reverb Pedal

Loaded with 36 tweakable reverb types, the Jumbo Blue Panther provides endless tonic varieties. A Dynamic mode automatically adjusts to your playing for thick ambience that won't turn your tone to mud.

**\$179.99**

*Moonshaker Devices*

**\$449.99**

## SRL Pedals

### GQ-80N

#### Your Distortion Workstation

The GQ-80N features '80s-style face-melting distortion, which allows it to dynamically adapt to any register. That means you get coldness, sweetness, and mellowness all across the fretboard, with excellent dynamics. Separate dry and effect outputs allow for 2-amp setups.

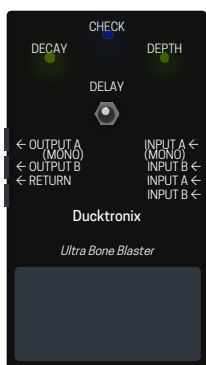

**\$329.99**

## Ducktronix

### Ultra Bone Blaster

#### Beyond Vintage Distortion

The Ultra Bone Blaster offers you the same amazing character as the original, without any of the clock noise—and that's just the Standard mode. Custom mode increases the maximum distortion from 381 to 464 and adds modern note definition and warmth to the tone.

**\$569.99**

## Ducktronix

### GO-9B

#### Ducktronix's Most Dazzling Distortion Station

The GO-9B sports the gritty, vintage sound that made the original a huge hit with rock guitarists decades ago. All the original magic is back with Ducktronix's reissue of this '70s effects pedal. The GO-9B actually offers dual sound banks that can be configured for stereo, series, or parallel operation, and an insert function even allows you to add external effects pedals.

**\$129.99**

## Ducktronix

### The Duck

#### Iconic Distortion

The Duck provides an enticing selection of 19 creative presets that cover everything from vintage tube distortion to next-gen solid-state distortion. It runs on either a 9-volt battery or the included power supply.

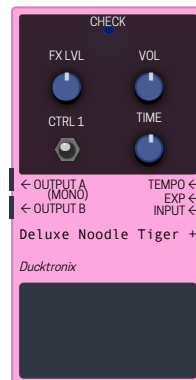

**\$299.99**

## Ducktronix

### Deluxe Noodle Tiger + Time-tested Distortion, Upgraded Tone

The Deluxe Noodle Tiger + delivers smooth, punchy distortion that's impressively versatile. At lower settings, it adds a subtle note definition to your playing. Turn it up a bit, and you'll be greeted with a dirty vintage jazz distortion tone. It's also a handy power supply for your pedalboard.

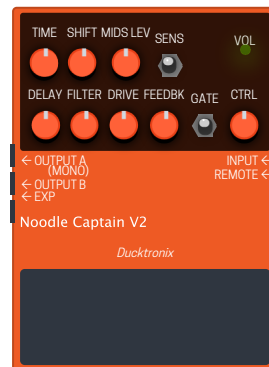

**\$209.99**

## Ducktronix

### Noodle Captain V2 Distortion for the Tone Freak

The Noodle Captain V2 offers an enticing selection of 15 creative presets that cover everything from classic tube distortion to modern solid-state distortion. It's also a handy power supply for your pedalboard.

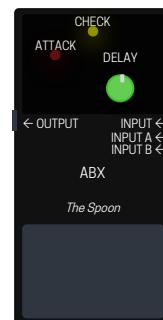

**\$89.99**

## ABX

### The Spoon

#### Incredible Distortion

When ABX decided to update the original Spoon with The Spoon, they added a whole new dimension to their popular distortion stomp box. With up to 42 tiers of freshness, you won't be short of possibilities.

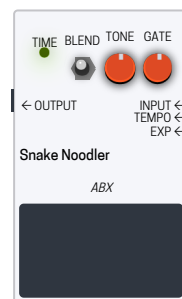

**\$189.99**

## ABX

### Snake Noodler

#### Beyond Standard Distortion

ABX's Snake Noodler allows you to create 8 cold tones with up to 9 types of high-quality performance and '80s-style face-melting distortion. Looking for edge-of-breakup, amp-style grit? It's here. Need ample options for external control? You've got it!

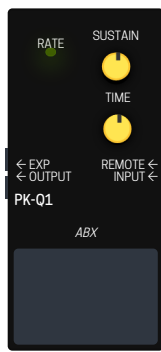

**\$479.99**

## ABX PK-Q1

### Time-tested Distortion, Upgraded Tone

Own the pedal that started it all—the ABX PK-Q1 is a faithful recreation of the original '69 K-Q1 pedal. It has the same dirty tone heard on early '70s records by Bill Connors, Norman Brown, and many others.

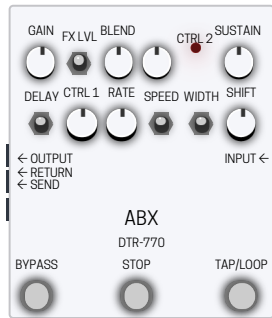

**\$439.99**

## ABX DTR-770

### Must-have Distortion with Something More

The power and versatility of ABX's 600 series has come to distortion in the DTR-770. Packed with vibrant-sounding distortion effects, the DTR-770's 99 built-in effect types mean serious professionals will never be short of ideas.

**\$569.99**

## ABX OTR-942

### ABX's Most Popular Distortion with So Much More

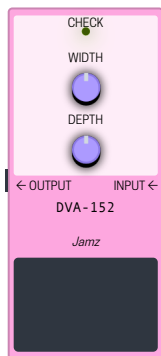

The OTR-942 features '80s-style face-melting distortion, which allows it to dynamically adapt to any register. That means you get mellowness, warmth, and smoothness all across the fretboard, with elite dynamics. It runs on either a 9-volt battery or the included power supply.

**\$589.99**

## Jamz DVA-152 Top-tier Distortion

The DVA-152 sports the warm, vintage sound that made the original a huge hit with rock guitarists decades ago. All the original magic is back with Jamz's reissue of this '90s pedal. With great headroom and definition, the DVA-152 is one of the most comprehensive distortion pedals you'll find in its class.

**\$299.99**

## Jamz Infinity Squisher Deluxe All the Distortion You Could Ask For

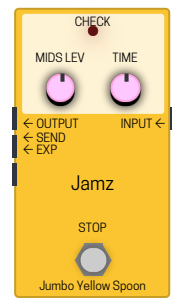

The Infinity Squisher Deluxe's mellow, meaty, and totally analog tones have kept it on the must-have stomp box list for more than 30 years now—and the second you engage this thing, you'll hear why. You can take the Infinity Squisher Deluxe from a subtle pulse to an oscillating shimmer to create crazy effects. Separate dry and effect outputs allow for 2-amp setups.
